

ORGANO™

G3 PREMIUM BEAUTY SOAP

Organo™ G3 combines gentle exfoliation from apricot seed, luxurious foam from coconut oil, softening with grapeseed oil, gentle ganoderma antioxidant support, and glutathione radiance to gently sweep away excess oils, skin cells and debris from the skin.

Multi-action, multiple benefits.

Provides a gentle, exfoliating cleansing along with fresh, invigorating ingredients that can help provide a radiant glow from your head, to your toes. Gentle enough for the whole family, this luxurious soap is more than a gentle refreshing clean, it is nurture for your skin.

WHAT IS IT?

Organo™ G3 Premium Beauty Soap is a rich, lathering soap with a fresh scent that can leave your skin feeling gently cleansed, exfoliated, and nurtured. Just wash your face, hands, or body with this refreshing multi-action soap and you can feel the softness, smoothness and natural radiance that your skin deserves.

KEY INGREDIENTS

Grape Seed Oil – great for oily, acne prone skin or sensitive. Grape seed oil is a light, soothing oil that is easily absorbed without leaving a greasy film on the skin or clogging pores. Helps provide a soft, smooth feeling to the skin.

Glutathione – is an antioxidant, it is also known for its ability to support clear, even toned skin and help support a youthful appearance.

Ganoderma lucidum– this mushroom is known for its powerful antioxidant properties, which can support youthful-looking,

radiant skin. Reishi mushrooms have been popular in facial care for many years, including facial peels favored by celebrities.

Saponified oil of coconut – Saponification is the term for “soap making” and the process of taking oil and making it into a soap. The oil of the coconut creates lots of glycerin, and makes a rich, creamy lather to soothe and sweep away oil and debris while cleaning the skin.

Apricot Seed – ground flecks of apricot seed in this premium soap help to provide gentle exfoliation to help sweep away tired, dull skin to reveal a fresher, youthful-looking glow.

DID YOU KNOW?

Soap making has its roots in Babylon, and started around 2500-2800 BC. A good cleansing routine can help your skin look radiant and fresh. Organo™ G3 contains apricot seed to help exfoliate dead skin cells. When we are young our skin cells turn over about every 21-28 days, but this slows to 40 or more days as we age. When the skin cells accumulate our skin can look dull and tired. It can also lead to clogged pores, which can result in acne. Caring for your skin includes gentle exfoliation to help keep it looking fresh, and radiant.

HOW TO USE IT

Great for the whole family, for hands, face, body to gently cleanse for radiant skin.
