

Bee Venom ANTI AGING MASK

A natural alternative to harsh anti aging treatments. The Bee Venom Mask helps stimulate the production of collagen and elastin in your skin and helps minimize the appearance of fine lines and wrinkles.

WHY BEE VENOM?

Bee Venom naturally contains a potent mix of enzymes, peptides, and amino acids that works on all levels of the skin to encourage natural cell regeneration and boost collagen formation which is responsible for maintaining the firmness and suppleness of your skin tissue thus, preventing the appearance of fine lines and wrinkles.

HOW IS IT HARVESTED?

Bee Venom is produced by the worker and queen honey bees. No bees are harmed in the production process of our Bee Venom mask! We follow a careful procedure:

1. The bees are attracted to a special glass panel.
2. A gentle electrical current runs through the glass panel that encourages the bees to sting the panel, emitting venom without harming them.
3. The venom is extracted and they can resume and return to their happy lives in their hive!

INGREDIENTS FOR YOUTHFUL SKIN

Search for these ingredients in all your skincare products to ensure healthy-looking skin.

Organic Shea Butter

This butter contains fatty acids and vitamins that help reduce inflammation and refresh your skin.

Vitamin E

Also known as alpha tocopherol, helps skin retain its moisture.

Jojoba oil

Known for its hydrating properties, it fights dryness and dull skin.

THE BASIC SKIN CARE ROUTINE
