

Healthy, Happy Smiles with OG SMILE

Toothpaste is a big part of our oral hygiene routine.

Brighten your smile with a ganoderma infused toothpaste that helps protect your gums and teeth.

- Fluoride free
- SLS free
- Freshens breath
- Maintain a good oral hygiene as part of a daily oral care routine.
- In naturally flavoured fresh peppermint

WHAT IS IT?

The OG Smile toothpaste is better than ever! Free from fluoride and SLS, it combines the unique benefits of the Ganoderma lucidum extract and other natural ingredients for a fresher breath and a brighter smile.

KEY INGREDIENTS

RICE BRAN OIL

TEA TREE OIL

**GANODERMA
EXTRACT**

**BAMBOO
CHARCOAL**

- **HYDRATED SILICA**
- **CITRIC ACID**
- **SODIUM N-LAUROYL SARCOSINATE**

There are over 300 different bacteria in our mouth, and this bacteria can convert sugar and carbohydrates into acids that damage the enamel of our teeth. It is why dentists recommend we brush our teeth after every meal and rinse or brush after drinking sugary sodas or other beverages. The OG Smile toothpaste can help brush away bacteria, while freshening your breath and gently cleansing and brightening your smile.

DID YOU KNOW?

Did you know that your enamel is the hardest substance in your body? Made up of mineralized tissues, this stuff is strong as nails! Enamel is designed to help us chew and tear through our food, but it still has its weaknesses. When not cared for, enamel can chip under pressure or decay due to plaque and bacteria.

HOW DO I USE IT?

- Using a soft toothbrush, squeeze toothpaste to cover bristles (or at least a 1 inch strip of the product) onto your favorite toothbrush.
- Brush teeth thoroughly for at least two minutes.
- It is recommended that we brush our teeth at least twice a day, preferably after each meal.
